

2.Partnership

2.1. Project partners

Please go to Annex I (select worksheet AI) Partnership and Annex I.1 'Involvement of project Partners' and list all partners in the total project starting with the Lead Partner. All partners will be automatically transferred to a summary sheet on page 1 of the annex where they are presented by institution and country.

Annex I.0 Partnership

The list on page 1 of this annex will be automatically extended and filled in after having filled in the contact information and budgets of each partner on the following pages of the same annex. Please note, that as soon as you provide the details for partner 3, an additional table for partner 4 will be automatically generated, and so on. You may list up to 50 partners.

In order to reflect the project's strengths in terms of transnationality as well as cross-sectorality, the applicant must list all partners participating in the project in Annex I of the application form. Please note that sub-contractors cannot be considered as project partners (the project partners must not subcontract one another).

All partners participating in the total project should be mentioned in the partnership list. Each partner that contributes financially to the project has to fill in the project partner budget table at the bottom of each partner box.

Please note, that partners from the Accession Countries, which will join the EU in 2004, can apply for ERDF funds on equal terms with EU member state partners and should fill in the fields in Annex I accordingly.

Annex IV Activities to be carried out on non EU territory

1. Please describe the activities that will be carried out in Russia and Belarus. Include the action plan (time table) and location of the activities.
2. Please describe the specific objectives, the target group and the expected results of the activities undertaken
3. How will the above-described activities be financed?
Please describe by what means these activities within the framework of the 'total project' will be financed. Please state what alternative financing the project sees (e.g. bilateral sources, national funding, private funding, BSR INTERREG III B NP), and whether any activities planned on non EU territory would need to be cancelled in case of no available funding.
4. How will the Russian/Belarusian partners contribute to/benefit from the joint project

The relevant information will be automatically transferred from Annex I.1
